## Software Engineer

+63 906-2866-662 | edison.cmeer@gmail.com | linkedin.com/in/edi-meer

### PROFILE

Experienced Software Engineer with expertise in backend development using Ruby on Rails and frontend development with React, Angular, and TypeScript. Skilled in building and maintaining scalable web applications, developing APIs, and delivering end-to-end solutions in Agile environments. Focused on writing clean, maintainable code and collaborating with cross-functional teams to deliver high-quality software.

### SKILLS

**Backend:** Ruby on Rails, API Design, RESTful Services, SQL, PostgreSQL

**Frontend:** React, Angular, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

**Testing:** RSpec, Unit Testing

**DevOps & Tools:** Git, GitHub, CircleCI, CodeClimate, AWS, Postman, Insomnia, TablePlus, VS Code

**Methodologies:** Agile/Scrum, CI/CD, Code Review

### PROFESSIONAL EXPERIENCE

#### Cloudstaff

November 2024 - Present

Software Engineer

- Develop and maintain core backend services for a property management SaaS platform using Ruby on Rails.
- Design and integrate RESTful APIs powering key features for property managers, owners, and tenants.
- Implemented frontend features in React with Tailwind CSS to enhance user dashboards, workflows, and user-facing modules.
- Ensure performance and scalability through query optimization, background jobs, and caching strategies.
- Write RSpec tests to maintain reliability and minimize production issues.
- Participate in Agile development cycles, including daily stand-ups, sprint planning, and retrospectives.
- Collaborate closely with product managers and other developers to deliver high-quality releases on schedule.
- Use Git and GitHub for version control, and CircleCI for automated CI/CD pipelines and code quality checks.

## You\_Source Inc.

March 2019 - March 2024

### Software Engineer

- Developed a microservice-based medical pre-employment screening system using Ruby on Rails (backend) and Angular (frontend).
- Designed and implemented RESTful APIs to handle data exchange between microservices and client systems.
- Wrote maintainable, test-driven code using RSpec, ensuring high test coverage and reliability.
- Used PostgreSQL as the main database and optimized queries for better performance.
- Managed CI/CD pipelines through CircleCI, automating testing and deployment workflows.
- Collaborated with cross-functional teams in Agile development, actively participating in daily scrums, sprint planning, and retrospectives.
- Conducted and participated in code reviews to maintain clean, consistent, and efficient codebases.
- Utilized Git and GitHub for version control and project collaboration across distributed teams.
- Mentored junior developers and interns on best practices in Agile development.

## EDUCATION

### Polytechnic University of the Philippines - Sto. Tomas

2015 - 2019

B.S In Information Technology
